

Let kids be kids linky 20/5/14

This is a linky all about letting kids be kids, getting back to basics and having great childhood fun. We live in such a fast paced modern world with so much technology and stresses round every corner, we often need to be reminded to just 'play' and have fun, it's healthy for us all (yes, that includes you parents!).

Please join me in spreading the word, for encouraging children to step away from the technology for a while and go out, run around, use their imaginations and just have general basic FUN!

There were many great posts last week, including a fab post from [Loving life with little ones](#) about bringing snails home from nursery. I loved the sand dune jumping from [My life my love](#) and an interesting post on august born school starters from [Make me an earth mother](#).

We enjoyed our [farm themed week](#) last week. This weeks theme for my weekly themed play/activities prompt is [nature](#). I hope you have fun trying some ideas out.

There's not many rules, just link up your posts (screen free), old or new, about genuine childhood fun (of any age). It may be fun outdoors, jumping in puddles, nature hunts, riding bikes or making mud pies. Or it may be fun indoors with arts and crafts, making dens, cooking, messy play or reading. Or how about visiting a farm or fun at a fete. Or a discussion about children growing up too fast, etc.

Whatever basic fun you have been having or discussing, link up and share your ideas, visit others to get inspiration and comment on as many as you can to give each other encouragement and support, but most importantly, HAVE FUN!

This linky will open every Tuesday for 6 days, so there's plenty of time to add your posts.

Please spread the word and grab my badge if possible from my sidebar.

If you tweet me your link (@karenattwinlife), I will happily retweet.

Follow the let kids be kids linky board on [pinterest](#).

If you have any good posts that you think Let kids be kids would like to hear about, please share on my Facebook page too [here](#).
